**usage question**

sokrypton commented on Jan 20

Another thing that got introduced in v3 is bfloat16 (which I think changes the results when used in v1/v2)  
To be consistent, I think this should be included in:

<https://github.com/deepmind/alphafold/blob/main/alphafold/model/config.py#L132>

```
common_updates = {"model.global_config.bfloat16":False}
```

**Author**

also maybe add:

```
common_updates = {'model.num_recycle':3}
```
