September 26, 2011

Dear colleagues,

I'm writing to draw your attention to a search for two faculty positions in systems biology and biostatistics at the assistant professor rank that may be of interest to your post-docs or former graduate students. The positions are in the Molecular Cell Biology group at the newest campus of the University of California (UC) in Merced. Applications of special relevance to research emphases include stem cell biology, diseases such as metabolic or inflammatory disorders, and microbial systems relevant to human disease. Applicants must have a Ph.D. and a record of research, publication, and teaching commensurate with a faculty appointment at the University of California.

The university also seeks applications for a Lecturer with Potential Security of Employment in biology.

Interested individuals can refer to the full postings at:

<http://jobs.ucmerced.edu/n/academic/position.jsf?positionId=3523>

<http://jobs.ucmerced.edu/n/academic/position.jsf?positionId=3528>

<http://jobs.ucmerced.edu/n/academic/position.jsf?positionId=3526>

For additional information on UC Merced or the current biomedical sciences research programs, they can refer to the following websites:

<http://med.ucmerced.edu/2.asp?uc=1&lv12=26&contentid=3>

<http://hsri.ucmerced.edu/>

UC Merced is an affirmative action/equal opportunity employer with a strong commitment to the achievement of diversity among its faculty, staff, and students, and we strongly encourage applications from women and underrepresented groups.

Sincerely yours,

David Ojcius
