

Passionate About Our Science and Our People

We're passionate and rigorous about our science. For more than 30 years, Genentech has been at the forefront of the biotechnology industry, using innovative science to develop breakthrough medicines that improve the lives of people with serious or life-threatening diseases. We're also passionate about our people, our most important asset. That's why we offer our employees:

- The chance to make a difference in the lives of patients
- An inclusive environment that encourages innovation
- Extraordinary colleagues
- Highly competitive benefits

Scientist – Small Molecule Formulation, South San Francisco, CA

Requisition Number 00375084

Responsibilities

We are seeking an Associate Scientist/Scientist to support drug discovery and development in the Small Molecule Pharmaceutical group. The candidate will serve as the key formulation contact for Discovery projects. This person will be responsible for both strategic and tactical deliverables from the pharmaceuticals area to the discovery project team, which include but not limited to, strategic input to project team, identify and problem solve issues relating to formulation and pharmaceutical properties, provide pharmaceutical support for lead optimization and selection, and formulation support for preclinical in vivo studies. This person may also be responsible for project advanced into early clinical development stage, which include but not limited to direct and/or conduct salt/polymorph screening, physical form evaluation and selection, preformulation, and development of appropriate and effective clinical formulations for NCEs. The candidate will represent the Pharmaceuticals function in multidisciplinary project teams at various drug discovery and development stages; he/she will need to work closely with team members in a cooperating fashion to ensure project progression and to proactively communicate pharmaceuticals/formulation issues and creative formulation approaches.

Experience Required

Candidate must have a strong scientific knowledge in Pharmaceutical Sciences with a proven records of publications. In-depth knowledge absorption process, PK/PD and application of such knowledge in science-based formulation approaches and drug delivery design is required. The successful candidate must have good communication and problem-solving skills and be a team player. The job candidate should have a Ph.D in Pharmaceuticals, Chemistry, or related fields with minimum of 0-5 years-experience in the Pharmaceutical Industry.
