

The Aitchison laboratory at the Center for Infectious Disease Research is seeking an outstanding **Postdoctoral Scientist** to conduct research investigating host-pathogen interactions. The successful candidate will work within a multi-disciplinary, highly collaborative team that is investigating infectious disease using systems biology approaches. The Aitchison lab uses high-throughput quantitative 'omics technologies (e.g. proteomics, transcriptomics) in combination with computational biology to interrogate, map, and model pathogens, host responses, and the interface between hosts and pathogens. Please address the position requirements below in your application. For more information about ongoing projects in the lab, see the website: <http://www.cidresearch.org/labs/aitchison>

### **Position Requirements**

- Ph.D. or equivalent in biomedical sciences
- Candidates with a background in virology and/or computational systems biology are encouraged
- Experience and strong interest in host-pathogen interactions are required
- Strong written and verbal communication skills
- Ability to establish clear goals and to organize and prioritize work
- Ability and willingness to work with a diverse team of scientists, including post-docs, students and technicians

### **Organization Overview:**

Nearly 40 years ago, the Center for Infectious Disease Research was founded as an independent non-profit organization devoted to the research of global infectious disease. The Center holds true to those roots today, having grown to include over 250 staff members who work collaboratively with one common goal: to eliminate the world's most devastating infectious diseases. To learn more about the Center for Infectious Disease Research and the remarkable individuals you would support, please visit our website at [www.cidresearch.org](http://www.cidresearch.org)

Apply online through our website at <https://cidresearchcareers.silkroad.com/>. If you need assistance with our online application contact us at [jobs@cidresearch.org](mailto:jobs@cidresearch.org).

In compliance with the ADA Amendments Act, should you have a disability that requires assistance and/or reasonable accommodation with the job application process, please contact the Human Resources department via e-mail at [jobs@cidresearch.org](mailto:jobs@cidresearch.org). Additionally, the affirmative action program/plan is available for review upon formal request by employees and applicants for employment in the Human Resources office during regular office hours.

*The Seattle Biomedical Research Institute dba Center for Infectious Disease Research is an Equal Opportunity Employer and all qualified applicants will receive consideration for employment without regard to race, color, sex, sexual orientation, gender identity, religion, national origin, age, protected veteran status, disability status, or any other characteristic protected by law.*
